Madrid 3 November 2026

On behalf of the Official Association of Geomatics and Surveying Engineers of Spain (COIGT), it is our great pleasure to invite you to participate in TOPCART 2027, an international forum dedicated to advancing knowledge and innovation in geomatics engineering, surveying, geodesy, cartography, remote sensing, geographic information systems, and geospatial technologies, during 19, 20 and 21 May 2027 in Madrid.

TOPCART 2027 will bring together researchers, academics, industry leaders, public authorities, professionals and technology providers from around the world to exchange knowledge, present cutting-edge developments, and strengthen cooperation among academia, government institutions, and the private sector.

The conference programme will feature keynote lectures, technical sessions, scientific presentations, panel discussions, technology exhibitions, and networking activities addressing major challenges and opportunities related to Earth observation, satellite positioning, digital transformation, geospatial intelligence, environmental monitoring, sustainable territorial management, and the future of geospatial sciences.

In recognition of your distinguished professional and academic contributions, we would be honoured by your participation in this international event. We firmly believe that your expertise would greatly enrich the scientific and professional discussions that will take place during the conference.

Further information regarding the conference programme, important dates, registration procedures, and participation opportunities is available at https://www.topcart2027.com.

Yours faithfully,

25105900C RICARDO RODRIGUEZ (C:Q2861004F)
