

Parallel TWG session: TWG Circular Resource Management

3rd CCRI Coordination and Support Workshop

– Making circular investments pay off for cities and regions –

Brussels, 13 November 2024, 14:00-15:45 CEST

The TWG is continuing its work on three identified topics, visiting them in alternance during the meetings. Since the overall workshop focuses on financing and funding/project financing, we will follow this closely and provide a space for exchange based on concrete examples and an opportunity to exchange with the financing experts who will be present during the day.

Objectives of the session

The session aims to:

- Discuss and learn from real cases/experiences of the TWG members on what worked well and what did not when it comes to project development, financing and implementation
- Identify the needs of the members specifically about financing/project development process
- Provide an entry to capacity building and further learning to the cities& regions via exposure to experts on funding.
